UCD ARCHITECTURE (DN100)

BSc (Architectural Science) (Hons) (NFO Level 8) and MArch (NFO Level 9)

STUDYING UCD ARCHITECTURE

The main pathway to becoming a professional architect includes three steps: a) Completion of the BSc Architectural Science, b) Completion of the Master's in Architecture (MArch) and c) Completion of the Professional Diploma after a minimum of two years in practice.

Year 1
Engage with the principles

Architectural Design (Studio-based learning), History & Theory of the Designed Environment, Architecture & its Environment, Architectural Technologies, Theory & Design of Structures, Into Practice

Years 2 & 3
Refine your knowledge

Architectural Design (Studio-based learning), History & Theory of the Designed Environment, The Indoor Environment, Architectural Technologies, Theory & Design of Structures, Imagining Architecture, Framework for Practice

BSc (Architectural Science) (Honours)

Optional Year Out
Experience the world of work

Years 4 & 5
Achieve mastery of your practice

Design Technologies, Research & Innovation in the Designed Environment, Professional Studies, International study abroad options, Architectural Design (Studio-based learning), Research Dissertation, Reflective Portfolio, Master's Design Thesis (Studio-based learning)

MArch (Honours)

WHAT MAKES A GOOD ARCHITECT?

Our Architecture course attracts a diverse cross-section of talents and approaches – from the technically minded to the artistically gifted; from the socially conscious to the natural communicators and leaders. All have the capacity to become successful and productive graduates in Architecture.

UCD ARCHITECTURE (DN100)

BSc (Architectural Science) (Hons) (NFQ Level 8) & MArch (NFQ Level 9)

INTRODUCTION

UCD Architecture is Ireland's longest established and most prestigious architecture course. Over the past century, UCD Architecture has been of central importance to all aspects of Ireland's architectural culture. From O'Donnell + Tuomey to Grafton Architects, many of our graduates have achieved worldwide renown, while our research and graduate courses have contributed at an international level.

CAO Points Range 2016

515 – 625

Length of Course

3 Years (BSc) (Hons) + 2 Years (MArch)

Places

56

Entry Requirements

- English
- Irish
- Mathematics
- A third language
- Two other recognised subjects

Leaving Certificate

You must obtain a minimum of Grade H5 in two subjects and a minimum of Grade O6/H7 in the remaining four subjects

A-Level/GCSE

see www.ucd.ie/myucd/alevel

Level 5/6 FETAC Entry Routes

None

Level 6/7 Progression Entry Routes

Yes, see www.ucd.ie/myucd/hetac

Mature Entry Route

Yes

KEY FEATURES

Only Architecture degree in Ireland to be accredited by the professional institutes of both Ireland (RIAI) and the United Kingdom (RIBA)

This School of Architecture is also pursuing accreditation with the professional institute in the USA (NAAB)

2 UCD Academics are the 2015 recipients of the Royal Gold Medal (the world's most prestigious architecture award)

Exposed to the instruction from world renowned practices including, Grafton Architects and O'Donnell + Tuomey Architects

Unique facilities in the Richview / Newstead Buildings at Belfield

Home to Ireland's best Architecture Library

Dedicated design studios, workshop, building laboratory, computer labs and exhibition space

Access to UCD Horizons Elective Modules

International study opportunities (including Europe, Asia, America and Australia)

WHAT'S ON OFFER THROUGH ARCHITECTURE IN UCD?

When students enter Richview, the home of UCD Architecture, they enter a world of creativity, innovation and diversity. Creativity lies at the core of the course. From the outset, the emphasis is on students proposing creative solutions to set problems and situations. Through learning by doing, students propose, test and develop ideas. There is a strong emphasis on group work and collaboration, mainly through design tasks and problem solving.

At UCD our aim is to continuously deepen understanding, extend capacities and broaden horizons in relation to architecture. As your skills in architectural drawing, model making, surveying, scale and measurement develop, design projects of increasing complexity are introduced in which these skills can be applied.

UCD produces architects capable of addressing global and societal issues. The architecture design studios based in the UCD School of Architecture, Planning and Environmental Policy are hubs of creativity, capable not only of producing award-winning designs but also of responding to some of today's greatest issues and challenges, such as increasing urbanisation, the need

EDUCATIONAL MODEL

Entrants into UCD Architecture are awarded a Master's degree (MArch) upon completion of the full five-year programme of study which comprises the three-year BSc (Architectural Science) degree followed by the two-year Master's programme (MArch).

Having satisfactorily completed the first three years of the architectural course, students will automatically be awarded the BSc (Architectural Science) degree. For follow-on entry into the MArch, students must satisfy the progression requirement.

Progression requirement from BSc (Architectural Science) to MArch: minimum degree award GPA of 2.8 (mid 2H2) for automatic progression. Students who do not achieve a GPA of 2.8 will be offered an interview to assess their suitability to progress.

For those who do not continue with the MArch course, the BSc qualification provides an opportunity to pursue associated professions such as landscape architecture,

for sustainable development, and the possibilities for technological innovation. As a result, the course is constantly evolving, seeking to extend architecture's role and potential in a complex world.

During your time at UCD your lecturers will include many architects who are at the forefront of their profession and have won national and international acclaim for their buildings. The reality of cutting-edge practice feeds directly into the lecture theatre and design studio, encouraging and motivating the student to come up with realistic yet creative answers to real-life problems. At the same time, our academic staff are leading research in areas such as: sustainable development; environmental modelling; technological innovation; and, the history and theory of architecture, cities and landscapes.

If you have a capacity and passion for creativity, for making things through technological invention or artistic experimentation, and you're excited by the idea of designing buildings, urban environments and landscapes, then this course is for you.

planning or research, and also an option to transfer into other areas of study.

Throughout this degree, two main elements are taught each year: the design project and the lecture programme. The design project is based in our design studios and taught through a combination of lectures, individual tuition, field trips, group tutorials, large reviews and exhibitions (architectural design, drawing and model making). The lecture programme can be grouped under three broad headings:

Technical: Architectural Technologies, Structures, Environmental Science

Cultural: Architectural History & Theory, Ecology, Conservation, Perspectives on Architecture

Managerial: Professional studies

A combination of continuous assessment and end-of-semester written examinations is used. In your final year, you'll also submit a report of your design research project.

Career opportunities

Most architectural graduates go into architectural practice or on to further academic study in architecture or related subjects. Your skills are transferable, which enables you to work anywhere in the world. Some architects also work in other areas such as:

- Planning
- Cultural and artistic practice
- Heritage site management
- Curatorial work
- Landscape

UCD Architecture offers a wide range of taught master's, research master's and doctorate programmes.

UCD LANDSCAPE ARCHITECTURE (DN120)

BSc (Hons) (NFQ Level 8) & MLA (NFQ Level 9)

INTRODUCTION

UCD is at the forefront of Landscape Architecture education in Ireland. UCD is currently the only university in Ireland to offer an undergraduate degree in Landscape Architecture. This course is accredited by the Irish Landscape Institute (ILI) and recognised by the International Federation of Landscape Architects (IFLA – Europe).

If you love design, nature and the outdoors, are interested in society and the ways that we live, and want to make a better, more beautiful and sustainable future for our towns and countrysides, then Landscape Architecture is for you.

This exciting programme teaches you how to design with nature to improve our environment and the quality of our lives. Landscape Architect's work combines scientific and cultural understanding, design creativity, and knowledge of materials and structures with an understanding of ecology, land use and ecosystems. They work on all sorts of projects, all over the world, designing habitats for humans and non-humans: homes for city birds, playgrounds for children, rooftop gardens, streetscapes, city parks and even cities themselves. They transform urban and rural land, and water-bodies, and advise on countryside matters. Landscape design engages environmentalism, urbanism and culture, teaching important transferable skills that you'll use wherever you are, whatever you do in the future.

UCD Landscape Architecture is taught in unique facilities in the School of Architecture, Planning and Environmental Policy in the Richview/Newstead buildings on the Belfield campus. These facilities include bright and airy studios, a well-equipped workshop and building laboratory, exhibition spaces and the best architectural library in the country.

WHAT'S ON OFFER THROUGH LANDSCAPE ARCHITECTURE IN UCD?

The design studio is central to Landscape Architecture. You will spend most of your time in the studio, pursuing individual and small group project work structured to foster the creative problem-solving skills needed to develop an understanding of space and context, and a respect for natural processes. You will learn by doing design projects that allow you to develop creative skills and apply knowledge taught through lectures, seminars, drawing classes, field trips, reviews, readings, individual and group tutorials.

Studio programmes are taught by practising landscape architects, many of whom are leaders in their profession whose work is widely recognised on a global level.

EDUCATIONAL MODEL

The UCD Landscape Architecture degree course comprises two main elements: studio project work and lectures. Design modules make up 50% of this degree course and students spend half of the week in the studio. Design methodology is taught and practised in studio-based landscape design modules involving on-site projects and requiring an important element of self-direction. As students progress through the course they will learn to inform design decisions by analysis of information concerning the natural and cultural processes affecting particular case studies. The other half of the course involves lecture modules, which provide theoretical material in the areas of ecology and the earth sciences, landscape planning, management, materials and construction techniques. In addition to their core landscape architecture modules, students have the option to take elective modules from throughout UCD on the Horizons programme, which will enable them to choose to study modules across a varied range of subjects from politics to philosophy, language to law and art history to maths.

The Landscape Architecture degree at UCD is part of the European Landscape Education Exchange. This Erasmus programme is a landscape architecture education network involving 11 universities in Europe and providing student exchange. Students regularly spend time abroad, either on short field trips, participating in intensive design studios with students from other universities, or opting to spend a semester studying at one of our partner universities.

Our education model is designed to give students the creative ability and discipline to work alone or as part of a team of specialists. As graduates, Landscape Architects frequently work as part of large multidisciplinary teams alongside architects, engineers, planners, artists, ecologists, and surveyors. Such is the broad overview gained in UCD Landscape Architecture that graduates are often chosen as the master planners for large-scale projects.

Lectures fall into three main categories:

Ecological and Environmental Sciences: Land Use & the Environment, Environmental Impact Assessment, Landscape Ecology, Soils, Biology, Botany, Trees & Shrubs.

Human Sciences, Technology and Culture: Landscape History & Theory, Archaeology, Rural & Landscape Planning, Landscape Materials & Construction, Aesthetics, Drawing and Landscape Representation.

Professional and Managerial Skills: Professional Practice, Law, Research and Writing.

A combination of regular studio reviews, reports, as well as end-of-semester written and portfolio examinations is used to assess your work. The 4th year concludes with a design thesis based on a subject of your own choosing.

Career & graduate study opportunities

Graduates of UCD Landscape Architecture work all over the world because of their transferable skills. The increased emphasis at local and national level on the importance of the environment, green spaces, and sympathetic and aesthetically pleasing developments, means that landscape architecture is an expanding profession. Salaries are on a par with other professionals within conservation and the built environment, and the variety of employment opportunities makes landscape architecture an exciting option.

Our students become professional landscape architects, setting up in business, working in private practice, for governmental bodies or NGO's. Others go onto further academic study in landscape architecture, or related subjects and some go onto work in areas such as:

- Environmental and Ecological Policy-Making
- Conservation and Resource Management
- Planning or Urban Design

The majority of our students become professional landscape architects. After two years of approved graduate work experience, our graduates can sit the Irish Landscape Institute (ILI) professional practice exams leading to full professional membership of the ILI. Two Masters programmes, Landscape Architecture (MLA) and Landscape Studies (MArchSc), are available for those who wish to pursue the subject at taught graduate level. The School of Architecture also offers related Masters by Research and Doctoral programmes.

Jennifer O'Donnell,
Architecture Graduate

I have been fascinated by architecture since I was a teenager. It started when I learned to draw in Technical Graphics class in school, and from my first day in UCD I knew I had made the right choice. A typical day is spent in studio where you and your classmates learn the skills to analyse, design, present and critique a design project. Your tutors are practicing architects and academics, whose intellectual and professional knowledge is supported by a lecture series in history, structures, graphic design, 3D modelling etc. After I graduated from UCD I felt I had the skills, confidence and encouragement to take a risk. I moved to Germany, where I now work for Sauerbruch Hutton Architects in the centre of Berlin.

Colin Torpay,
Landscape Architecture Graduate

For as long as I can remember I have loved art and design. During secondary school, I was very interested in Geography and began to develop an interest in land use and the environment. A degree in Landscape Architecture offered me the opportunity to study a subject of great interest to me while allowing me to develop my artistic side. The course required a lot of hard work but the rewards compensated. I found myself with an understanding of environmental conservation and a concern for sympathetic future development, both urban and rural. Also, my design capabilities improved to an extent that I would never have thought possible. Having graduated in 2014, I was delighted to be offered a job with an eminent Dublin firm called BSLA and have since been working on some very rewarding projects.
